

OCTOBER 2020

## MLAS Release 2.5.16 Upgrade Alert

Updated versions of the Mining Lands Administration System (MLAS) are tested and installed regularly as part of our ongoing efforts to bring you one of the most comprehensive mining lands management systems in the world. The following applications and/or functions have been improved or newly-implemented:

### Assessment Work Updates:

- The time allotted to load the “Revise Pending Distribution” menu in MLAS has been increased to allow larger distributions to be revised.
- A validation has been added to the “Cost/Unit” data fields in the “Submit Report of Work” and “Submit Report of Work on Crown Land” menus in MLAS. The “Cost/Unit” data fields only allow six integers and two decimals.

### Claim Management Updates:

- NEW - Cancelled Claim Report. MLAS users can search for cancelled claims by date, mining division and township.
- We have reduced the number of Impending Forfeiture notices that are sent out. Only those claims in “Active,” “Active Abandonment Pending,” “Active Partial Abandonment Pending” and “Active Pending Transfer” status’ will receive these notices.
- The error causing some claim abstracts to not load has been fixed.
- All eligible mining claims can now merge successfully.
- The exclusion of time error that caused work requirements to increase instantly has been fixed.
- The issue where one boundary claim in a cell had cancelled and the remaining boundary claim would not expand if in “Active-Pending Transfer,” “Requested for Lease” or “Hold Pending Extension” has been resolved. The remaining boundary claim will expand at forfeiture regardless of status.

### For More Information

If you have questions, call the Mining Lands Section at 1-888-415-9845 or email us at [pro.ndm@ontario.ca](mailto:pro.ndm@ontario.ca).
